Objective

My background in both retail management and full-stack software engineering has given me a unique perspective on the importance of effective communication, leadership in fast paced environments, and technical expertise to drive business growth. I have honed my technical skills over the past two years by programming and building a variety of complex projects. I am excited to apply my experience in a role that values innovation, collaborative problem-solving, and opportunities for growth as a software engineer and team member.

Technical Projects

Capstone Live Chat Application - GitHub JS | GitHub Ruby | Demo
Leveraging my expertise with Ruby on Rails, React, CSS and Material UI, I created a real time chat application.
- Implemented JWT authorization to utilize session storage to improve user security and experience.
- Utilized Action Cable with Rails and WebSocket for real-time communication.
- Built a fully responsive and intuitive user interface with CSS and Material UI.
- Configured Active Storage in Ruby with AWS S3 to enable image uploading for users in a production environment.

Avengers Initiative - GitHub
Access marvels API to search through characters and assemble a team of your own.
- Implemented a navigation bar with a dynamic pop out menu using CSS and a search bar utilizing controlled input state in React.
- Utilized pagination with limited server requests to improve efficiency.
- Established a database using Ruby to persist data saved by the user.

Planning Event Calendar - GitHub | Demo
Utilizing Ruby on Rails, React and CSS, I created an all-in-one calendar app for freelancers to manage clients and events with an interactive calendar display.
- Initialized a secure authorization system utilizing JWT with Ruby.
- Implemented an interactive calendar UI with React and CSS.
- Streamlined event and client management by creating a form for freelancers to store and change data with React and PostgreSQL.

PROFESSIONAL EXPERIENCE

Freelance Software Engineer   September 2022 – Present
Remote
- Designed a digital business card and styled it according to business trends.
- Worked with client to meet desired aesthetics driving the business growth.
- Developed an application to efficiently organize data between clients and associated events, featuring an intuitive calendar interface for easy access and management.

Store Manager   August 2013 – September 2021
Starbucks, Pasadena CA
- I was elected Manager of the Quarter Q4 2019 in the region for exceeding all sales metrics, leading the region in customer experience.
- Developed and managed over 30 employees at a time, promoted more than 10 baristas to supervisors and 5 supervisors to Store Managers.
